## Queensland State Championship Eights

### *Ted Hale EIGHT to the FORE!!*

Ted Hale Rowing has been building eights, as part of our range since 1988 - yet many in the rowing world are unaware of this fact - and that we still build eights!

Ted Hale Eights have achieved numerous victories in the Heads of the River Races in Brisbane, Sydney and Tasmania and have been used by the Queensland King's Cup Crew on a number of occasions and have performed very well when compared with higher profile brands.

At the QLD State Championships in Bundaberg in December, University of Queensland Boat Club won the State Championship in their Ted Hale Eight - adding another chapter to the success story. We congratulate the fine athletes who provided 'the motor' to enable the success.

## Features

### Pg - Contents

- 1 - Queensland State Championship Eights
- 2 - Carbon Fibre Rigger
- 3 - Changes
- 4 - Staff at Ted Hale Rowing
- 5 - People who race Ted Hale Boats

## CARBON FIBRE RIGGER CONTINUES TO IMPRESS

The introduction of our Carbon Fibre Bow Mounted Wing Rigger continues to draw enormous interest, with the production now available on singles, doubles and quads. The development process continues with the design of our soon to be released rowing rigger in similar format.

- Our new wing rigger consists of the main rigger arms plus 3 mouldings which:-
- 1 - attach the rigger to the boat (Stand)
  - 2 - provide the connection from the rigger arm to the head (Goose Neck)
  - 3 - provide the attachment point from the head to the pin ("C" Bracket)

These 3 mouldings are all Injection moulded - and following the design and manufacture of the actual moulds, we then conducted tests on different materials for use in the manufacture of the actual components.

Those who have already tried the Carbon Fibre Bow Mounted Wing Rigger all express delight in the positive drive provided.

**If you are in the market for a new boat, we urge you to try our system before you commit to a purchase. We are sure you will love the experience.**

## Changes at Ted Hale Rowing...

Dianna Spedding, our Marketing and Sales Manager, departed after 12 months to pursue family interests. We wish her well and thank her for her contribution - particularly in the web page and bulletin area.

Due to this change, the website and the bulletin came to a halt there for a little while. We apologise for any inconvenience this may have caused, but everything is back on track and running well. We will continue to publish the Bulletin - but at this stage we will change to a quarterly issue. The website will continue to be updated regularly, and for all those 'coming soon's', keep looking!

The 'Ted Hale Rowing' website is easy to navigate and is consistently appearing on the first page of the 'Top 100 Rowing Sites' in the world. Please visit our website at [www.tedhalerowing.com.au](http://www.tedhalerowing.com.au) for all your rowing needs.

## The Staff at Ted Hale Rowing

### Winfried Plasa

We welcome Winfried Plasa to our staff. "FRED" brings with him a wealth of knowledge both from his rowing background in Germany and from his professional background in Engineering and Design (Architecture).

### Steve Wickham

Steve has been a part of the Ted Hale Rowing team as a sub-contractor for many years now and specializes in welding, fittings and troubleshooting.

### Daniel Hawkins

Daniel has just started his Marine Craft Construction Apprenticeship with us this year and is responsible for various aspects of detail and finishing work of a very high quality.

### Jane Hale

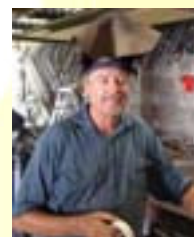

Jane, the oldest of Ted's daughters, has been responsible for the accounting sector of the business for the past few years, but is now also taking on the responsibility of the web-site and the bulletins.

### Kerrie Hale

Kerrie, Ted's youngest daughter, also played a big part in the development of the web-site.

**All the staff contribute to the further development of our products and are an integral part of decision-making.**
