

**Ted Hale Rowing Pty Ltd announce a major adjustment of prices – Downward!
We have maintained the same basic price list for a number of years now –
with thoughts of protecting the viability of Australian Boatbuilding
businesses - and thus resisting the temptation of price cutting.**

**However, with the continued high valuation of the Australian Dollar – and
the influx of cheap (and some not so cheap) imports we have decided we
must re-position ourselves in the marketplace**

**The price reductions shown in the updated price lists for Current Existing
Stock
are based on approximately 20% discount across the full range of available
boats – and will continue until further notice – and whilst stock is available.
Our “Spring Special” price list – for used boats also reflects a price reduction!**

**We call your attention to our comments on this website headed “All that
glitters is not Gold” – and underline the investment we – and others in the
Australian boat-building industry have made in infrastructure maintained to
support the sport in Australia.**

Current Stock Price List - Effective 1st August 2012

**F1 Series Boats - with bow-mounted Carbon Rigger
- Carbon Hull with honeycomb core**
